Remove the original bucket.

Lay the adapter plate on the mounting surface so the outer most holes line up.

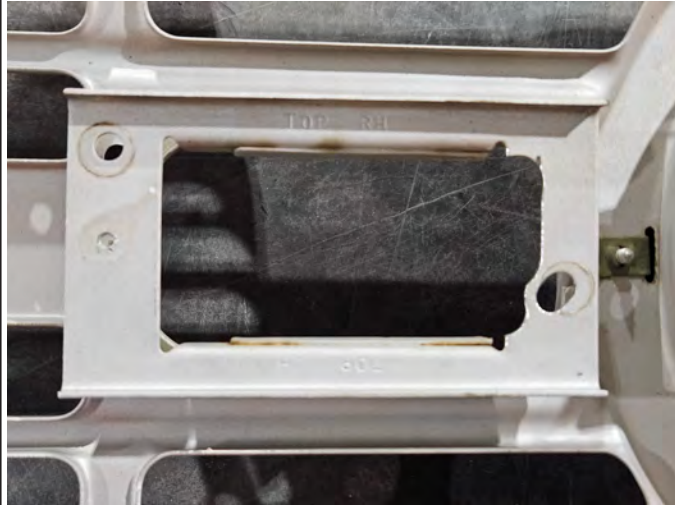

Mark the area to be trimmed. Making sure to enlarge the hole adequately.

INSTRUCTIONS

PAGE 3

Trim the areas that were marked, and deburr the edges. Paint or protect the material to prevent rust.

Line the plate back up with the mounting bracket. Use the hardware from the turn signal bucket to mount both pieces to the grill. Insert the plastic push pin where the plate lines up with the original hole in the grill.
